

Can I get a quote from you?

Last Modified on 04/12/2024 10:44 am MDT

NOTE: We are not a wholesaler and do not source parts or materials for other companies. We will ONLY provide quotes for parts, supplies, and materials that are part of our normal inventory (found on our website).

We welcome requests for quotes from both retail and wholesale customers, however please note the following:

- **We do not offer volume discounts to retail customers.** The prices published in our catalog, website, and advertisements are firm regardless of the quantity purchased (subject to market changes without notice.)
- To help expedite the process please be sure to include the EXACT part number(s) and quantities required.
- If you want your quote to include shipping charges, we will need your full shipping address, not just a country or zip code. Note that the quoted shipping fees will be an ESTIMATE only and are not 100% accurate. Univair reserves the right to adjust your shipping costs (higher or lower) once an order is fully packed and ready to leave our warehouse, regardless of what we quoted.
- **We do not quote products that are not a part of our normal inventory** (i.e., car parts, electronics, batteries, machinery, tools, lumber, etc.).
- Quoted prices on our products are good for 10 days only from the date of the quote, and are subject to change.

Please call our Sales Department at 303-375-8882 during regular business hours to request a quote.

Dealer Accounts / Wholesalers

- Companies wanting dealer discounts will first need to send us a copy of their Tax ID issued by their state. See the article "[Net 30 Accounts and Dealers Accounts](#)" for the requirements.
 - For existing Dealer Accounts, please contact your assigned salesperson directly with your RFQ.
-
