

Availability of Stock

Last Modified on 12/13/2022 3:57 pm MST

Univair carries over 21,000 parts in our inventory, with about 3,000 of those items being sold in such large volumes (our top sellers) that stock levels turnover almost monthly. With an inventory this large, shortages and out-of-stock items are bound to happen.

If you want to know if a part is in stock before ordering, please contact our sales department via phone or through our [Contact Us](#) page.

- Most out-of-stock items from vendors have an average 10 to 14 business day lead time, although since the COVID-19 pandemic, some vendors have been taking a lot longer to fulfill our orders.
- Parts manufactured at Univair take 10 to 14 business days on average to replenish inventory.
- Build-to-order parts manufactured at Univair require an average of 6 weeks to complete (this does not include shipping time).

If an item is out of stock, our sales staff can provide an expected restock date based on the best information available to us.
